
BASICS

Basics

The product list is valid until further notice. All track part numbers are for a (1) pair.

ABC classification is made to inform about delivery time. It is just a guideline and it cannot always be kept because of holidays or other upcoming situations like peaks in orders, lack of raw material etc.

A = Stock products or up to 2 weeks delivery time

B = 2 - 4 weeks delivery time

C = More than 4 weeks delivery time

Other Track models will be offered on request.

Track Shipping

Tracks are normally shipped in 4 rolls on one or two pallets. The joining track locks are either mounted on the ends of the rolls or in a joining set box.

For every set of tracks you will need the correct tightening/tensioning tool. Olofsfors has 3 types to offer; chains, a ratchet tool, and a geared tool. Please ensure that you have the right tool for your tracks.

BASICS

Manufacturing

The tracks are made from carbon manganese steel, alloyed with boron by a special metallurgical treatment. After hardening with water, the steel has a 500 HB degree of hardness. The steel has good welding properties and wear characteristics.

Important order information to get the right track:

1. Tire dimension
2. Tire brand and model
3. Machine type and model
4. Ground conditions
5. Type of use

(No 1 and 2 is very important)

Recommended ECO-Tracks linkage system

Machines/Maximum load	Tire size	Track model	Link Ø	Link hook
Harvesters	26,5	09X-	22 mm	15 x 45 mm
Forwarder 10-15 ton load	26,5	09X-	22 mm	15 x 45 mm
Harvesters	26,5	09X-	22 mm	15 x 45 mm
Forwarder 14-18 ton load	26,5 - 30,5	29X-, 39X	26 mm	18 x 45 mm
Forwarder 18 ton load >	26,5 - 30,5	49X-	30 mm	30 x 50 mm

ECO-TRACK™

ECO-TRACK™

One concept, the best all around track. Fits most machine types and offers good traction and good carrying capacity on most ground conditions.

EVO™

EVO™

New cross member design with very good cleaning properties. Allround properties with carrying capacity without sacrificing grip. New side support with softer sides and wider supporting surface towards the tire results in less tire wear. New stud position reduces stress in the material and increases strength.

22 mm link system

Part no.	Description	Tire Model	
094-661020	EVO 22 710/40 x 24.5	Nokian FKF	A
094-644020	EVO 22 710/45 x 26.5	Nokian FKF, ELS, Forest Rider	A

WHEEL TRACK™

ECO-WHEEL TRACKS™

Olofsfors ECO-WHEEL TRACKS are manufactured for wheeled forest machines. For the "CTL" machines there is a ECO-Wheel Track with lighter cross members. ECO-WHEEL TRACKS is a very economical alternative to conventional fire chains.

Cleating type 1, 2, 3. Other options are also possible.
